

# Facilities

A facilities maintenance crew works to cleanup road right-of-way areas, and the grounds of public properties, such as the parks, cemetery, and Town Hall. The Town utilizes labor from the Inmate Work Program from the Apache Unit of the Dept of Corrections Prison, in maintenance and construction work for all the Public Works programs. The crew typically consists of a Public Works Supervisor specially trained by the Arizona Department of Corrections, and a crew of 5 day laborers, who come from the minimum-security prison, and have been carefully screened before being allowed to work on cleanup and maintenance projects. The Town utilizes these work crews to minimize the cost of labor, but frequently these workers provide welding, concrete work, and carpentry skills.
